Lapel High School

Lapel Indiana

Foreword

We the Seniors of Lapel
High School proudly present the
1967 Bulldog yearbook.

We will endeavor to unveil "Where the
Action Is" through people, school life, sports,
and advertisements.

We have spent twelve toilsome years opening the
doors to knowledge and wisdom. We have conquered
obstacles which have given us a keen insight on the
problems of our present day. We hope this knowledge
has prepared us to become the future leaders of man-
kind.

The Senior class wishes to express its sincere
appreciation to the faculty, students, and also
the residents of our community who have helped
us to fulfill our class motto:

"We hold our heads high, for our aim is
success."

People

"People, people who need people are the luckiest people in the world."

The world is full of different types of people.

Lapel is fortunate in having many, many types of people. The variety of people is endless; therefore, individualism flourishes.

laughing people . . . studious people . . . teaching people . . . short people . . . marching people . . . singing people . . . lazy people . . . long-haired people . . . dull people . . . tall people . . . sad people . . . dancing people . . . scientific people . . . serious people . . . skinny people . . . happy people . . . working people . . . sincere people . . . gay people . . . ordinary people . . . fat people . . . sympathetic people . . . rich people . . . intelligent people . . . lonely people . . .

Where The Action Is . . .

SPORTS

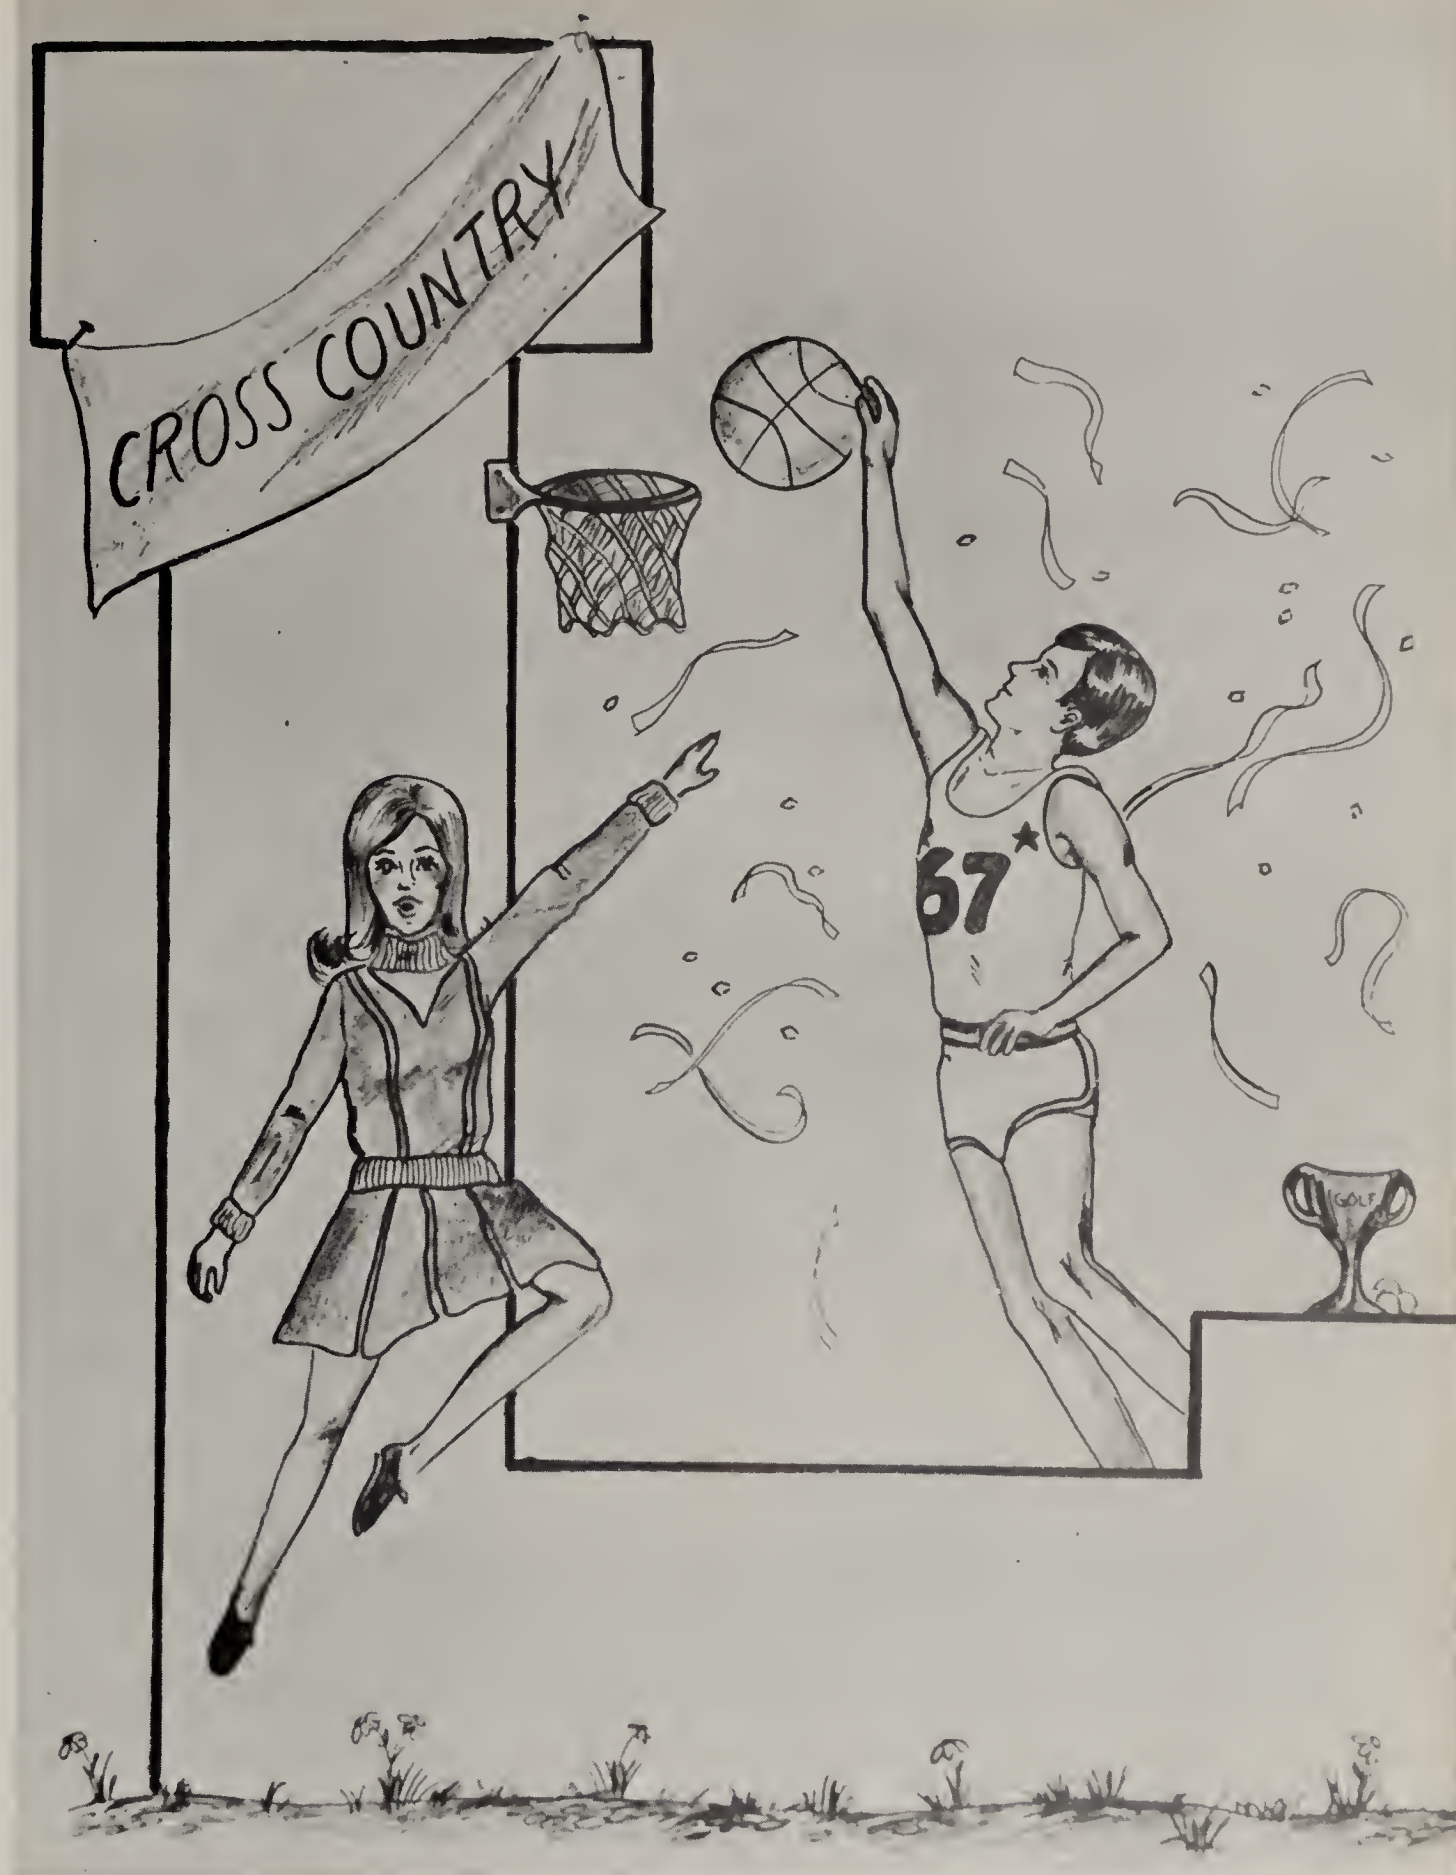

The world of sports is a varied field. It's values are many and great. Without sports our lives would be indeed dull and tiring!

Sports teach each participant the importance of a healthy mind and a healthy body. The use of good sportsmanship and co-operation that is needed for successful team work is also essential in the production of responsible individuals.

Some of the varied symbols of the sports' world include:

running feet...cheering voices...basketball trophies...Steff's pep talks...frantic cheerleaders...radio coverage...county tourneys...sailing golf balls...marching bulldogs...worn-out track shoes...screeching whistles...full parking lots...strutting majorettes...whirling baseballs...high hurdles...half-mile relays...swinging clubs...tense overtimes...foul balls...final scores...hours of practice...nervous coaches...home runs...

The four legged monster

On Wednesday, February 22, 1967, the Carmel gymnasium rocked to the wild yells of enthusiastic basketball fans as the State Tourney got underway.

The first thrilling game of the Carmel Sectional featured Noblesville's Millers and the Westfield Shamrocks in a fight to the finish. Shamrock fans got the victory.

The second game featured our "never-say-die" Bulldogs versus the Sheridan 'Hawks. An exciting tied halftime led on to a fighting finish as the Bulldogs tumbled 64-74. The Blackhawks went on to be the eventual runners-up to champion Carmel. But the real victors were the Fighting Bulldogs - the team that never gave up.

Our Bulldogs watch hopefully as another basket is enroute for the Blackhawks.

Layton and Rich look dumb-founded as Watson jumps for the ball.

Which circle is darker?

Sure. You could make a guess. With a 50-50 chance of being right.

But you know that success, in this age of science, takes more than guesswork. It takes careful observations. Accurate comparisons. Logical analysis. Sound deduction. These are traits we value at our new Engineering and Research center in Anderson—and we have the tools to implement them.

For instance, if a real closeup of something is desirable, we pop it under our electronic microscope and magnify it up to 200,000 diameters. If we want to analyze materials for their metallic elements, we use a spectrograph, accurate to a few parts in a million. These help us in designing new ignition systems for cars. Or control devices for missiles. Or a new kind of generator.

Look us up, after college, if you think you'll be at home in our field. Right back home in Indiana.

(Oh, yes, if you used your scientific insight and folded the page to compare the circles, you discovered the answer.)
